	Motor	50								9 m ²			27 m ²

* When blinds are connected, a deviation of max. 20° concerning the tilting of slats towards each other occurs.

Products with exceeded minimum or maximum guaranteed dimensions may have different functional properties, especially these: more difficult operation, worsen closing movement, greater deflection of slats, inclined movement, reduced wind resistance. In the pricelist these products are marked as non-guaranteed.

When the connection is straight, it is possible to connect max. 3 external blinds.

When the connection is at 90° or 45°, it is possible to connect max. 2 external blinds.

For motor-operated blinds, it is recommended by the manufacturer to place the motor in the middle of the blind (it does not apply to EXT-50).

6. External blinds F-80

6.1 Product specification

Standard version

- ✓ operation by crank - anodized
- ✓ gear-box, bushing POK 45°, □ 6 x 6, length 31 cm
- ✓ head rail 56 x 58 mm - zinc-coated
- ✓ mounting holders MD 1 - zinc-coated
- ✓ guide rails VL (1, 2, 3) - anodized
- ✓ brackets K 1 - anodized
- ✓ guiding pin - plastic
- ✓ tape 8 mm
- ✓ ladder, spacing 69 mm
- ✓ standard slat colours according to the colour collection
- ✓ slat tilting to one side
- ✓ bottom rail - anodized
- ✓ fasteners

Other possible versions

- ✓ operation by motor
- ✓ bushing POK 90° or other; detachable crank; interior gear-box
- ✓ head rail 57 x 59 mm - Al
- ✓ mounting holders MD 1a - stainless steel, MD 1b - spring
- ✓ guiding in wire; wire-extra (wire holder DL standard)
- ✓ slat tilting to both sides - only in wire
- ✓ guide rails VL (4, 5, 6, 7, 8, 9)
- ✓ brackets K (2-6); telescopic brackets TK (1-6); TKP (1-4); TKK (1-8); PK 70 (only for VL 4, 5, 6)
- ✓ open version (working position)
- ✓ locking of bottom rail
- ✓ RAL colours

Extra charges – see p. 38-42.
